# IT 2200
# IT NETWORK TECHNICIAN

## PROGRAM DETAILS

Now is the perfect time to gain your network certification through the IT Network Technician Online Certification & Training Program. The Network+ program builds on existing user-level knowledge and experience with personal computer operating systems and networks to present fundamental skills and concepts that students will use in any type of networking career.

Network+ Certification is the computer industry-recognized credential that certifies the competency of Network Technicians. This course prepares you for maintaining a wide range of networking technologies with the knowledge needed to compete in this growing and in-demand field internationally.

The Network+ exam is sponsored by CompTIA - the Computing Technology Industry Association and administered by Prometric. This certification program is supported by industry leaders such as Microsoft, Dell, Hewlett-Packard and Novell and backed by over 50 major computer hardware and software manufacturers, vendors, distributors,resellers and publications.

This course will help prepare students for the CompTIA Network+ certification exam.

## AT THE END OF THIS PROGRAM, YOU WILL BE ABLE TO:

✓ Manage and troubleshoot a basic network infrastructure, using common ports and networking protocols

✓ Know how to perform proper computer safety procedures and best practices

✓ Install, configure and differentiate between common network devices

✓ Understand and apply networking technologies and basic network design principles

✓ Install and manage wired and wireless networks, adhering to standards and using modern testing tools
