

HI 6000 MEDICAL ASSISTANT

PROGRAM DETAILS

Clinical Medical Assistants are multi-skilled allied healthcare professionals who may administer medications, assist with minor procedures, record vital signs, take medical histories, prepare patients and rooms for examinations, handle laboratory specimens, provide patient education and much more. Because of the specialized skill set and knowledge that is held by these professionals, they find themselves working in clinics, physicians' offices, hospitals, outpatient facilities and specialists' offices across the country.

Our medical assistant online program covers a wide range of skills and objectives that expand beyond the primary functions of a medical assistant. The program was developed by industry experts and through technology, provides students with a one-of-a-kind learning experience. Throughout the program you will be able to interact with the curriculum through 3D virtual office scenarios, clinical skill simulations, animations, assessment gamification and activities.

Students are prepared to perform both clinical and administrative duties required in a medical facility through our medical assistant online class. Throughout your medical assistant training, you will have a team of Subject Matter Experts, Student Success Advisors and Coordinators providing support. This program does not include an externship.

****PLEASE NOTE:** This program is NOT available to students who plan to work in the state of Washington. Many states have licensing or certification requirements for those performing the role of a Medical Assistant. This program is aligned with and/or prepares candidates for certification or licensure in each state except Washington.
